START WITH SAFETY

— THE BEST COOKS ARE SAFE COOKS, SO IT'S BEST TO HAVE AN ADULT HELP YOU IN THE KITCHEN. FOLLOW THESE TIPS TO AVOID ANY KITCHEN MISHAPS!

TIPS FOR COOKING WITH AN ELECTRIC FRY PAN

- Make sure the electric frypan is never left unattended
- Set the temperature to medium as it can heat up quickly
- Do not touch the frypan while it is on
- To avoid scratching the frypan do not use metal utensils
- Turn off and unplug it as soon as you have finished cooking

HOW TO CHOP SAFELY

- Use a sharp knife, a blunt knife makes chopping much harder!
- Make a claw shape with your hand holding the food – keep your fingertips clear of the knife
- Keep a firm grip on the hand holding a knife
- Watch as you chop the food!

KEEP IT CLEAN

— Food will be tasty and safe to eat if you keep everything clean, including your hands, the food you are cooking with, equipment and work surfaces. Make sure you pay attention to proper food handling and storage.

Wash your hands

— Washing your hands is one of the simplest ways to prevent the spread of the germs that can make you sick. You need to wash your hands before you prepare food and also again if you go to the toilet, cough, sneeze, eat, drink, touch your hair, head or body or touch your phone.

Safe food handling

— To keep food safe and avoid cross contamination, which happens when harmful bacteria spreads via surfaces, hands or equipment, it is always best to:

- Tie long hair back
- Use clean and dry utensils for different food products
- Keep work surfaces clean and dry
- Handle food only as necessary
- When using gloves throw out the used pair and wear new ones each time you would usually wash your hands
- Use a spoon to taste your cooking, not your finger!
- Do not eat food while cooking

Guide to hand washing

— Wet hands with warm running water

— Add soap and rub over all areas of the hands, including fingers, thumbs and back of hands

— Wash for at least 20 seconds (or the amount of time it takes to sing happy birthday)

— Dry thoroughly using a single-use paper towel

HOW TO READ RECIPE MEASUREMENTS

WHY DO WE NEED TO KNOW HOW TO MEASURE INGREDIENTS?

When we measure ingredients properly it helps our recipes turn out the way we want them to.

MEASURING TIPS

- Dry ingredients (like flour and sugar) should be measured using flat-cup measures. Ingredients should be level.
- Spoon measures must be measured with the correct sized spoons. A level spoon is essential.
- Liquid ingredients can be measured in measuring jugs, cups or spoons.
