

How does the FEAST Primary school program address the Australian Curriculum?

The FEAST Primary School Program is a truly integrated unit that touches many different learning areas. The content addresses concepts around healthy eating, food and fibre production, food insecurity and consumer choice, as well as the chemistry of cooking.

The production of the cookbook takes the students through a design process that also develops skills in comprehending and creating procedural texts, measuring and estimating, using fractions, and data collection.

Specific Australian Curriculum learning areas and content descriptors, cross curriculum priorities and general capabilities addressed include:
